

Install the Mblock(IDE) on Windows PCs

First, get the PC version from <https://mblock.makeblock.com/en-us/download/>

mBlock web version
 Chrome browser recommended >>
 Support Windows/Mac/Linux/Chromebook

[Code with blocks](#) [Code with Python](#)

mBlock PC version
 Version: V5.3.0
 Released: 2020.11.06
[Released log >>](#) [Previous version >>](#)

[Download for Windows](#)
 Win7 or Win10 (64-bit recommended)

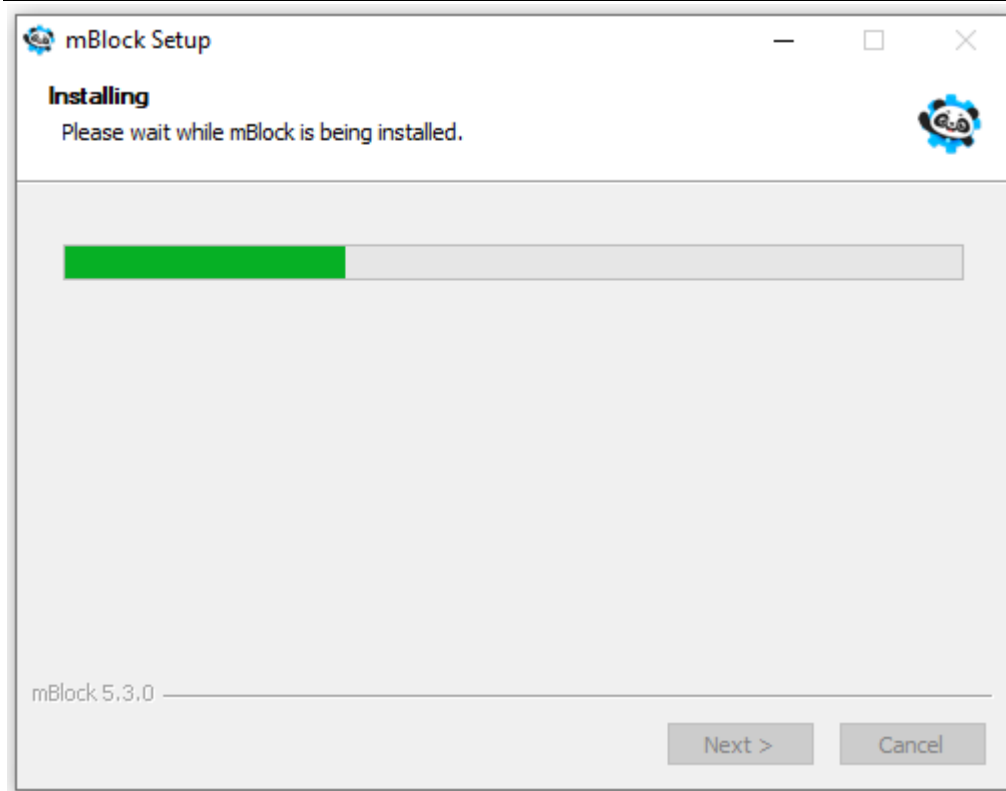

[Download for Mac](#)
 macOS 10.12+

Left-click the circled area and start to download the latest mblock installer. It may take 1-5 minutes to complete depending on your connection speed.

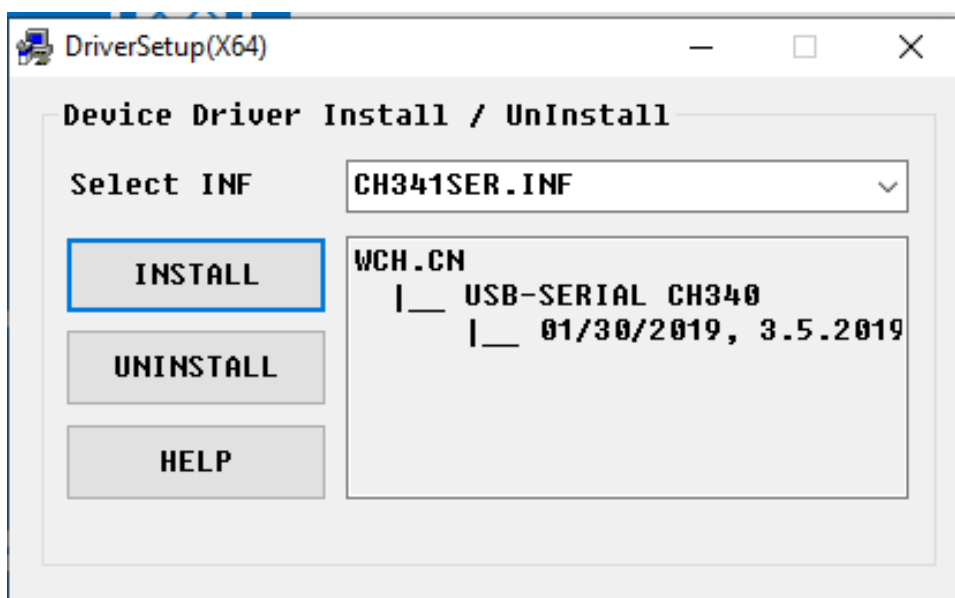

When the download finishes, find your installer, right-click on it and choose “Run as administrator”

<input checked="" type="checkbox"/>  V5.3.0.exe	6/1/2021 8:16 PM	Application	250,987 KB
--	------------------	-------------	------------

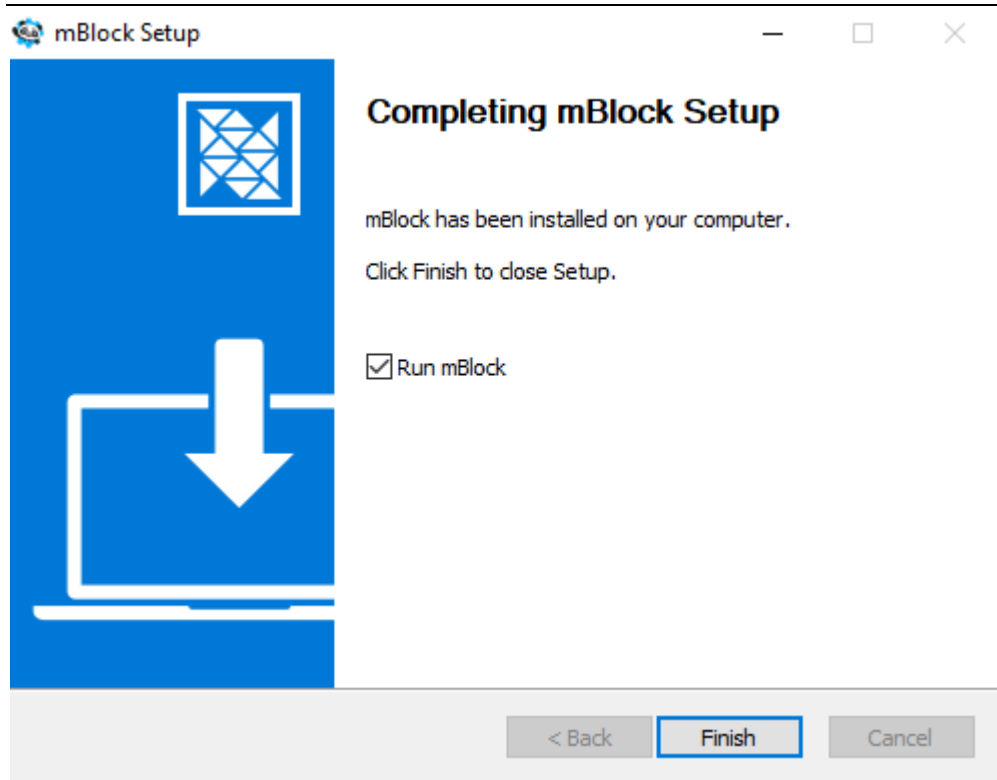

You will get a warning from the operating system, click ‘Yes’ to allow the installation process.

The software starts installing.

It will ask for installation of CH341 drivers. Click Install to continue.

After successful installation of the drivers, your installation will now be completed. Click "Finish" to quit the installer.

You can now find mblock IDE from your Desktop or Start Menu. Have fun!
